

Do ever larger **octopi** still amplify **reporting biases**?

Evidence from judgments of typical colour

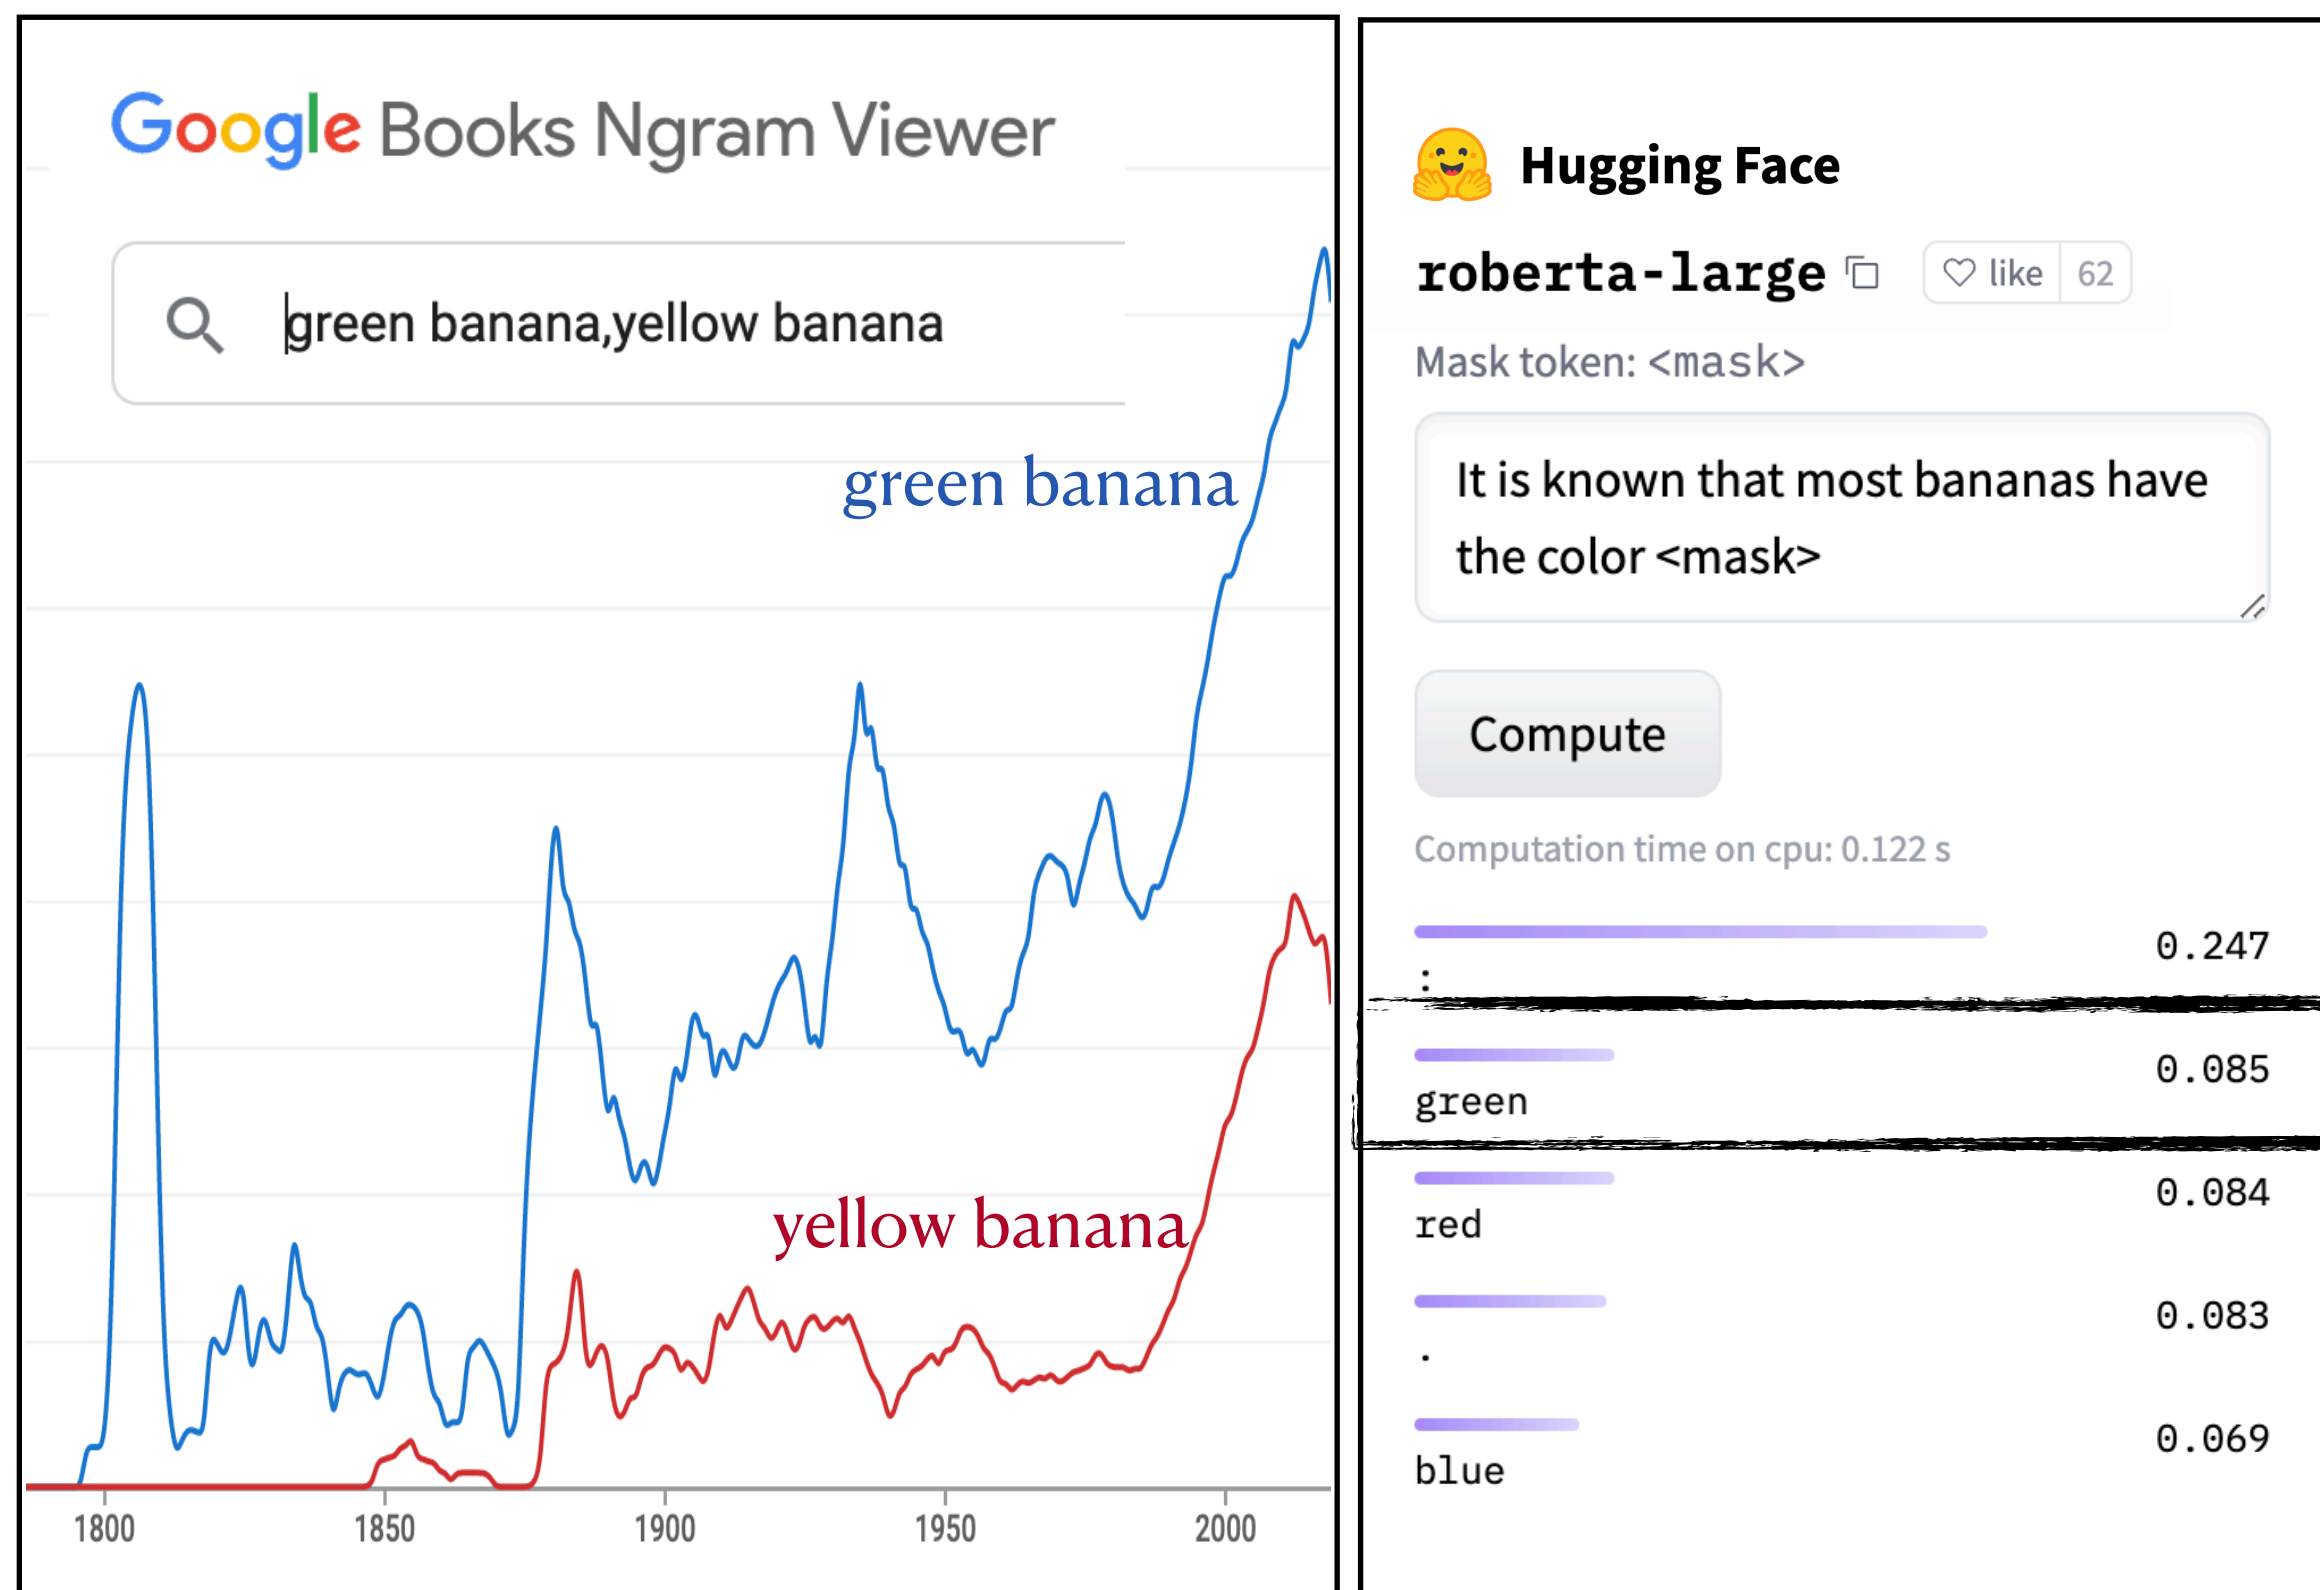

Fangyu Liu^{UC}, Julian Eisenschlos^G, Jeremy Cole^G, Nigel Collier^{UC}

AACL-IJCNLP
2022

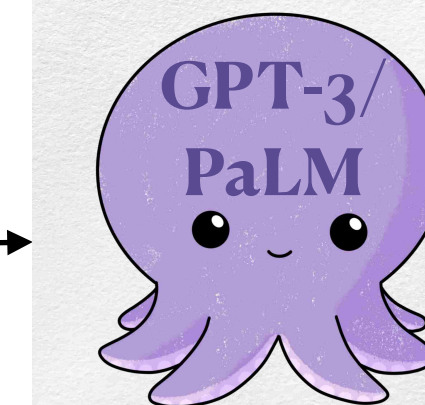

Reporting bias: texts rarely report on common facts, instead focusing on the unusual aspects of a situation. Eg. **green** bananas, **black** sheep.

A biased view of the physical world

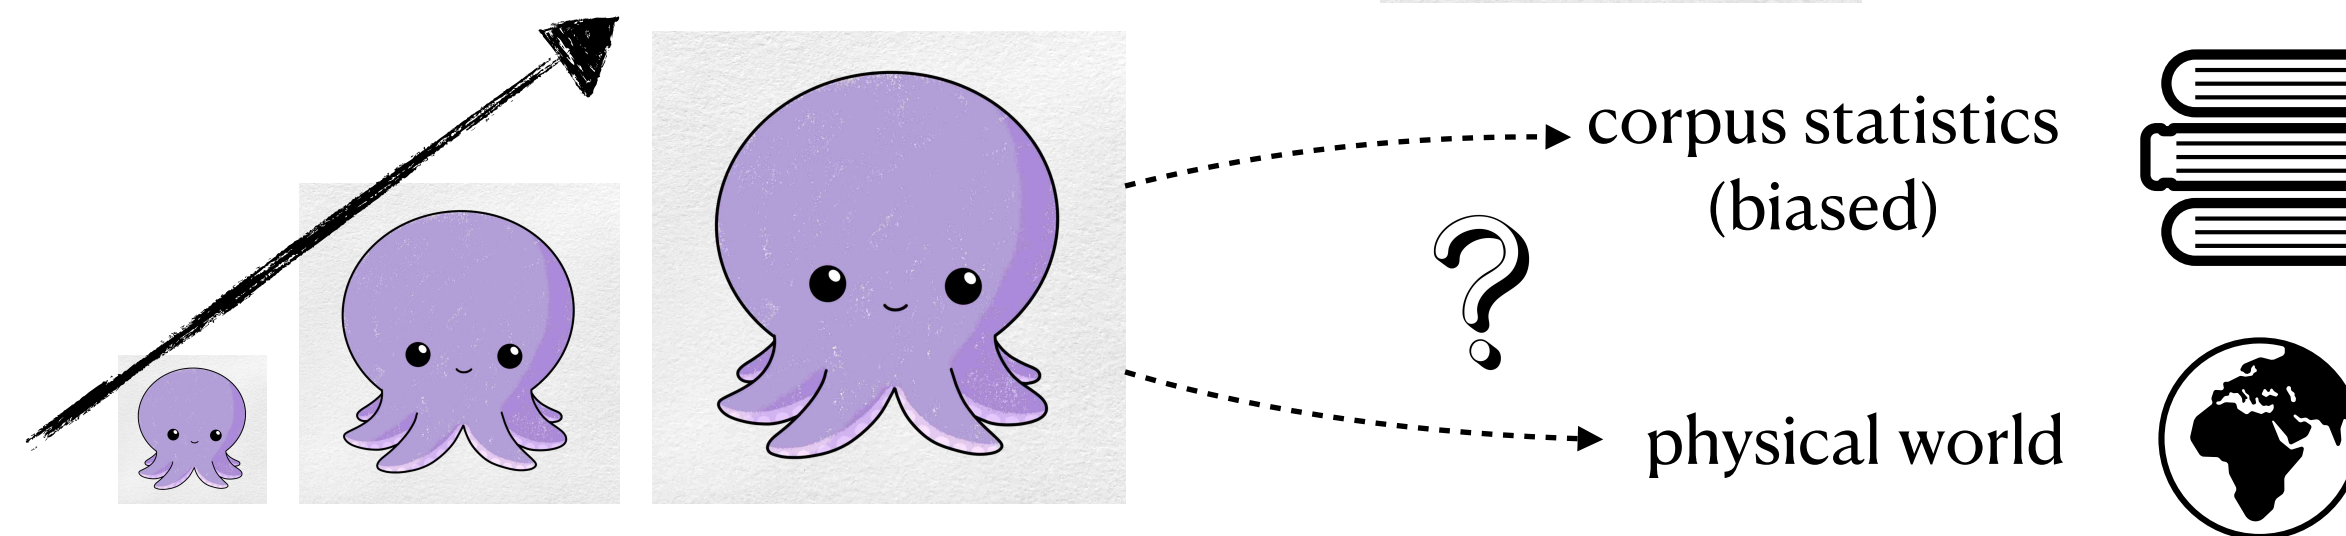

The task

It is known that most {OBJECT_q} have the color <mask>

blue

The question

The findings
